## CONTENTS OF VOLUME 8

NUMBER 1, MAY 1964

|                                                                                                                                                                              |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| BENARDO S. VANDERHEIDEN. Separation, Identification, and Quantitative Determination of $P^{32}$ -Labeled Phosphate Esters from Erythrocytes . . . . .                        | 1   |
| ISAAC NIR. Determination of Glucuronic Acid by Naphthoresorcinol . . . . .                                                                                                   | 20  |
| F. W. PRICE. A Rapid Paper Chromatographic Technique for Simultaneous Assay of Several Enzymes in a Tissue Homogenate . . . . .                                              | 24  |
| PHILIP S. CHEN, JR., A. RAYMOND TEREPA, AND KEA LANE. Sensitive Fluorescence Reaction for Vitamins D and Dihydrodrotachysterol . . . . .                                     | 34  |
| ROBERT G. MARTIN AND GARY FELSENFELD. A New Device for Controlling the Growth Rate of Microorganisms: The Exponential Gradient Generator . . . . .                           | 43  |
| GERRIT TOENNIES AND JOSEPH J. KOLB. Carbohydrate Analysis of Bacterial Substances by a New Anthrone Procedure . . . . .                                                      | 54  |
| PATRICIA STUTTS AND IRWIN FRIDOVICH. A Continual Spectrophotometric Determination of Ammonia-Producing Systems . . . . .                                                     | 70  |
| DAVID KUPFER. Qualitative Method for the Partial Characterization of Indole Derivatives . . . . .                                                                            | 75  |
| DAVID KUPFER AND DANIEL E. ATKINSON. Quantitative Method for Determination of Indole, Tryptophan and Anthranilic Acid in the Same Aliquot . . . . .                          | 82  |
| GRAHAM PALMER AND HELMUT BEINERT. Diffuse Reflectance Spectroscopy of Frozen Samples as an Adjunct to Low-Temperature Electron Paramagnetic Resonance Spectroscopy . . . . . | 95  |
| J. CHAMBERLAIN AND G. H. THOMAS. Characterization of 20-Oxosteroids by Gas Chromatography . . . . .                                                                          | 104 |
| J. W. SUTTIE. Assay of Citrate Production in Bone Slices . . . . .                                                                                                           | 116 |
| SHORT COMMUNICATIONS                                                                                                                                                         |     |
| J. M. SHEPP, J. P. MESSERLY, AND J. BOMSTEIN. Flow Cuvette for the Spectronic 20 Colorimeter . . . . .                                                                       | 122 |
| ALFRED GROSSMAN, GRACE F. GROSSMAN, ROBERT L. POLLACK, AND EDWARD KRAVITZ. Modifications to the AutoAnalyzer for the Rapid Recording of Optical Densities . . . . .          | 124 |
| EDWIN D. SEBRING AND NORMAN P. SALZMAN. An Improved Procedure for Measuring the Distribution of $P^{32}O_4$ among the Nucleotides of Ribonucleic Acid . . . . .              | 126 |

|                                                                                                                                                    |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| DOUGLAS H. SANDBERG, S. ALLAN BOCK, AND DAVID ALAN TURNER. Quantitative Measurement of Thalidomide by Gas-Liquid Chromatography . . . . .          | 129 |
| C.-G. GREF AND J. J. SAUKKONEN. Inexpensive and Practical Equipment for Thin-Layer Chromatography . . . . .                                        | 132 |
| J.-F. PECHÈRE. A Convenient Cell for Dialysis of Small Samples . . . . .                                                                           | 134 |
| LEONARD J. GREENBERG AND JEROME A. RODDER. New Precision Microcell Positioner and Cell Holder for the Beckman Model DU Spectrophotometer . . . . . | 137 |
| ERRATA . . . . .                                                                                                                                   | 142 |

## NUMBER 2, JUNE 1964

|                                                                                                                                                                                                 |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| M. S. NETRAWALI, R. RADHAKRISHNAMURTY, AND A. SREENIVASAN. New Fluorometric Method for Estimation of Citrovorum Factor . . . . .                                                                | 143 |
| B. HOLMSTEDT, W. J. A. VANDENHEUVEL, W. L. GARDINER, AND E. C. HORNING. Separation and Identification of Tryptamine-Related Indole Bases by Gas Chromatographic Methods . . . . .               | 151 |
| KAROLY G. PINTER, JAMES G. HAMILTON, AND O. NEAL MILLER. Quantitative Determination of Serum Triglycerides by Glass-Fiber Paper Chromatography . . . . .                                        | 158 |
| J. L. MCCARTHY, A. L. BRODSKY, J. A. MITCHELL, AND R. F. HERRSCHER. Thin-Layer Chromatography of Adrenal Corticoids: Observations on Change in Mobilities . . . . .                             | 164 |
| R. W. VON KORFF. Pyruvate-C <sup>14</sup> , Purity and Stability . . . . .                                                                                                                      | 171 |
| JULIA Z. RUTMAN, ROBERT J. RUTMAN, AND PHILIP GEORGE. An Effect of Manganese on the Glucose Oxidase and the Copper Reduction (Somogyi-Nelson) Method for the Determination of Glucose . . . . . | 179 |
| C. C. CURTAIN. Measurement of Hydrolysis of Acetylthiocholine with the Silver Thiol Electrode. Its Use in the Study of Serum Pseudocholinesterase Inhibition . . . . .                          | 184 |
| ROBERT O. QUESENBERRY AND FRANK UNGAR. Thin-Layer Chromatographic Systems for Adrenal Corticosteroids . . . . .                                                                                 | 192 |
| J. W. GILLET, L. P. S. VAN DER GEEST, AND R. P. MISKUS. Column Partition Chromatography of DDT and Related Compounds . . . . .                                                                  | 200 |
| E. MARSHALL JOHNSON. Quantification of Enzyme Activity Subsequent to Zone Electrophoresis in Starch Gel . . . . .                                                                               | 210 |
| LEON LACK AND MABEL SMITH. An Enzymic Determination of Reduced Glutathione . . . . .                                                                                                            | 217 |

|                                                                                                                                                                                                       |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| STIG ÅKERFELDT AND GUNN LÖVGREN. Spectrophotometric Determination of Disulfides, Sulfinic Acids, Thio Ethers, and Thiols with the Palladium (II) Ion . . . . .                                        | 223 |
| WALTER BODMER AND CARL SCHILDKRAUT. Preparation and Characterization of $^{15}\text{N}^2\text{H}^3\text{H}$ -Labeled DNA from <i>Bacillus subtilis</i> and <i>Escherichia coli</i> Phage T2 . . . . . | 229 |
| L. M. DOWLING AND W. G. CREWTER. Determination of Lanthionine in Protein Hydrolyzates . . . . .                                                                                                       | 244 |
| GEORGE C. MARTIN AND MAX W. WILLIAMS. Quantitative Phloridzin Analysis . . . . .                                                                                                                      | 257 |

# SHORT COMMUNICATIONS

|                                                                                                                       |     |
|-----------------------------------------------------------------------------------------------------------------------|-----|
| ARTHUR S. NUNN, JR., AND MOHAMMED SAYEED. Monophosphoesterase Determinations from Crude Tissue Preparations . . . . . | 261 |
| DAVID STEFANYE AND LEONARD SPERO. Automatic Amino Acid Analysis of Replicate Samples . . . . .                        | 265 |
| C. DE MARCO, F. RIVA, AND S. DUPRE. Synthesis and Chromatographic Properties of S-Carboxymethyleysteamine . . . . .   | 269 |
| ADRIAN C. KUYPER, THOMAS A. CORTESE, AND MOHSEN AGHDASHI. A Wet-Combustion Method for Carbon-14 Analysis . . . . .    | 272 |

## NUMBER 3, JULY 1964

|                                                                                                                                                                                                             |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| ROBERT N. FEINSTEIN, JUDITH B. HOWARD, LARRY B. BALLONOFF, AND JOHN E. SEAHOLM. A Rapid Blood Catalase Screening Technique Adjustable to Any Level of Activity . . . . .                                    | 277 |
| C. R. J. RUTHVEN AND M. SANDLER. Estimation of Homovanillic Acid in Urine . . . . .                                                                                                                         | 282 |
| R. C. WILLIAMS, R. S. RUFFIN, AND EDWARD R. BERRY. A Broad-Range Recording Microspectrophotodensitometer . . . . .                                                                                          | 293 |
| THEODORE E. FRIEDEMANN, PATRICIA K. KEEGAN, AND NORMAN F. WITT. Determination of Furan Aldehydes Reaction with Aniline in Acetic and Hydrochloric Acid Solution . . . . .                                   | 300 |
| PATRICK DUGAN AND DONALD LUNDGREN. Microdetection of Menadione, Coenzyme Q <sub>6</sub> , and Certain Related Quinoid Compounds in Biological Materials Using Electron Capture-Gas Chromatography . . . . . | 312 |
| W. N. M. RAMSAY AND JEAN V. FULTON. A New Method for the Assay of Small Amounts of Radioactive Iron ( $^{59}\text{Fe}$ ) . . . . .                                                                          | 319 |
| WESLEY C. STARBUCK AND WILLIAM J. STEELE. Large-Scale Ninhydrin Reservoir System for Automatic Amino Acid Analysis . . . . .                                                                                | 325 |

|                                                                                                                                                                                 |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| E. IRENE PENTZ. Liquid-Liquid Extraction in the AutoAnalyzer. Determination of Taurine . . . . .                                                                                | 328 |
| A. G. OGSTON. On the Estimation of Glucosamine in Hyaluronic Acid . . . . .                                                                                                     | 337 |
| C. F. DECKER, A. ARAS, AND LUCILE E. DECKER. Determination of Magnesium and Calcium in Cerebrospinal Fluid by Atomic Absorption Spectroscopy . . . . .                          | 344 |
| BENNIE ZAK AND LAWRENCE M. WEINER. Quantitative Electrophoresis of RNA Nucleosides . . . . .                                                                                    | 349 |
